What we do: Design & re-design of

Human-machine interaction

Web Sites (*large-scale*)

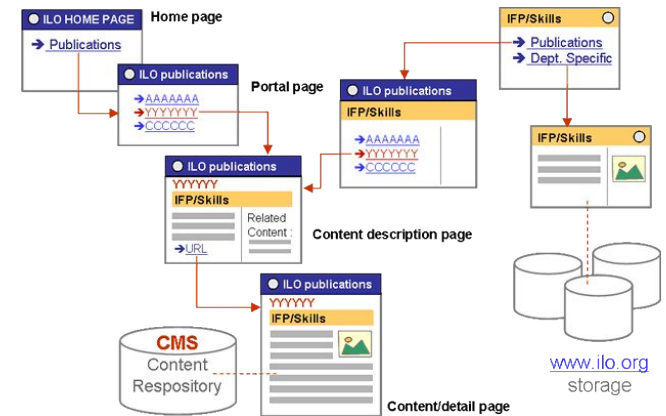

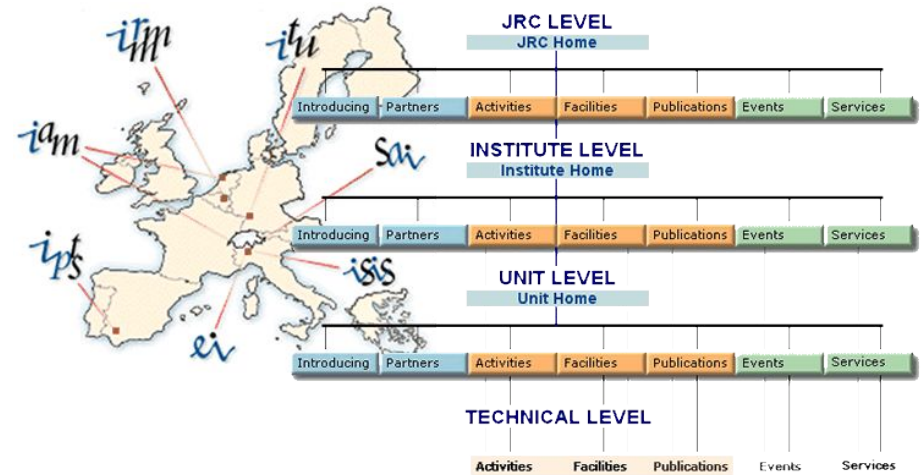

Information based

Web Applications

Actions based

Machine-machine interaction

System integrations

How we work

In scopes ranging from complete projects to small sub-projects, our working methodology unfolds in three areas developed in sequence (or alone)

1. Analysis, Strategy & Concept
2. Design (*front-end, back-office*)
3. User Interface development (*multi device*)
4. Implementation of the tool (*with partners*)

Analysis, Concept, Design

Analysis of business processes and users needs

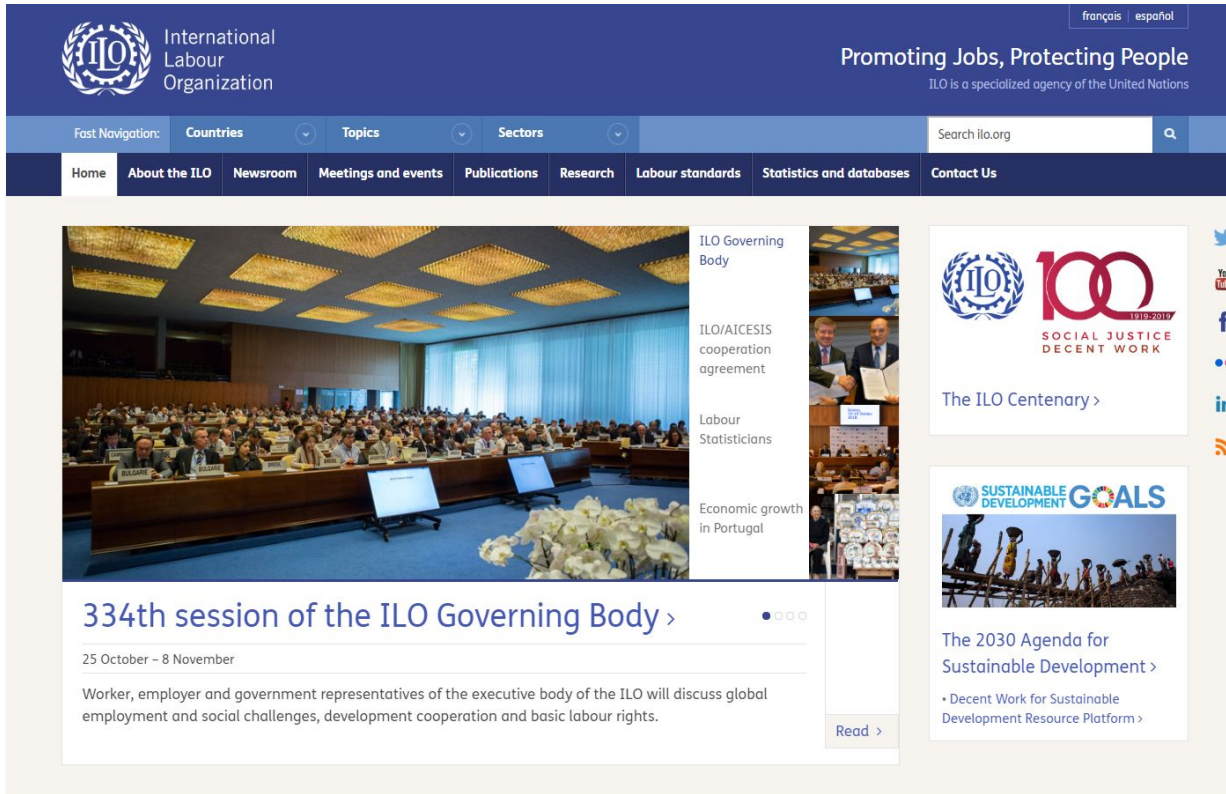

Operational and knowledge based requirements

Concept & Project guidelines

Design

- Information Architecture
- Interaction Design
- User Interface Design

International Labour Organization (ILO, UN agency)

Goal: creation of a coordinated web sites system for sub-sites, by means of a CMS. **Standardization of contents, navigation patterns and User interface.**
Tasks: Concept > Design > UI implement

Deliverables (some):

- ➔ The work process
- ➔ The solution in brief
- ➔ Navigation patterns & types of page
- ➔ WCMS: a way to manage contents
- ➔ Content type
- ➔ Metadata
- ➔ Taxonomy
- ➔ Migration templates

Compendium of court decisions

NORMLEX Home

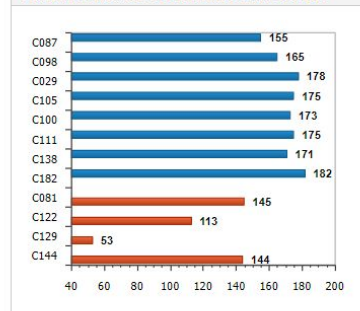

NORMLEX is a new information system which brings together information on International Labour Standards (such as ratification information, reporting requirements, comments of the ILO's supervisory bodies, etc.) as well as national labour and social security laws.

NORMLEX has been designed to provide comprehensive and user friendly information on these topics and includes the NATLEX database as well as the information which was previously contained in the former APPLIS, ILOLEX and Libsynd databases. [more](#)

Total number of ratifications registered since 1919

Fundamental and Governance Conventions

As of Today

ILO member States: 187

ILO instruments adopted: 400

- Conventions: 189
- Protocols: 6
- Recommendations: 205

Latest Ratifications

October 2018

- Israel - **P029** - Protocol of 2014 to the Forced Labour Convention, 1930 - 11 Oct 2018

September 2018

- Namibia - **C081** - Labour Inspection Convention, 1947 (No. 81) - 20 Sep 2018
- Namibia - **C122** - Employment Policy Convention, 1964 (No. 122) - 20 Sep 2018
- Namibia - **C151** - Labour Relations (Public Service) Convention, 1978 (No. 151) - 20 Sep 2018
- Namibia - **C188** - Work in Fishing Convention, 2007 (No. 188) - 20 Sep 2018
- Senegal - **C188** - Work in Fishing Convention, 2007 (No. 188) - 21 Sep 2018

August 2018

- Bosnia and Herzegovina - **P029** - Protocol of 2014 to the Forced Labour Convention, 1930 - 09 Aug 2018

Goal: new web site for the ILO International Labour Standard: migration and merging of 3 databases.

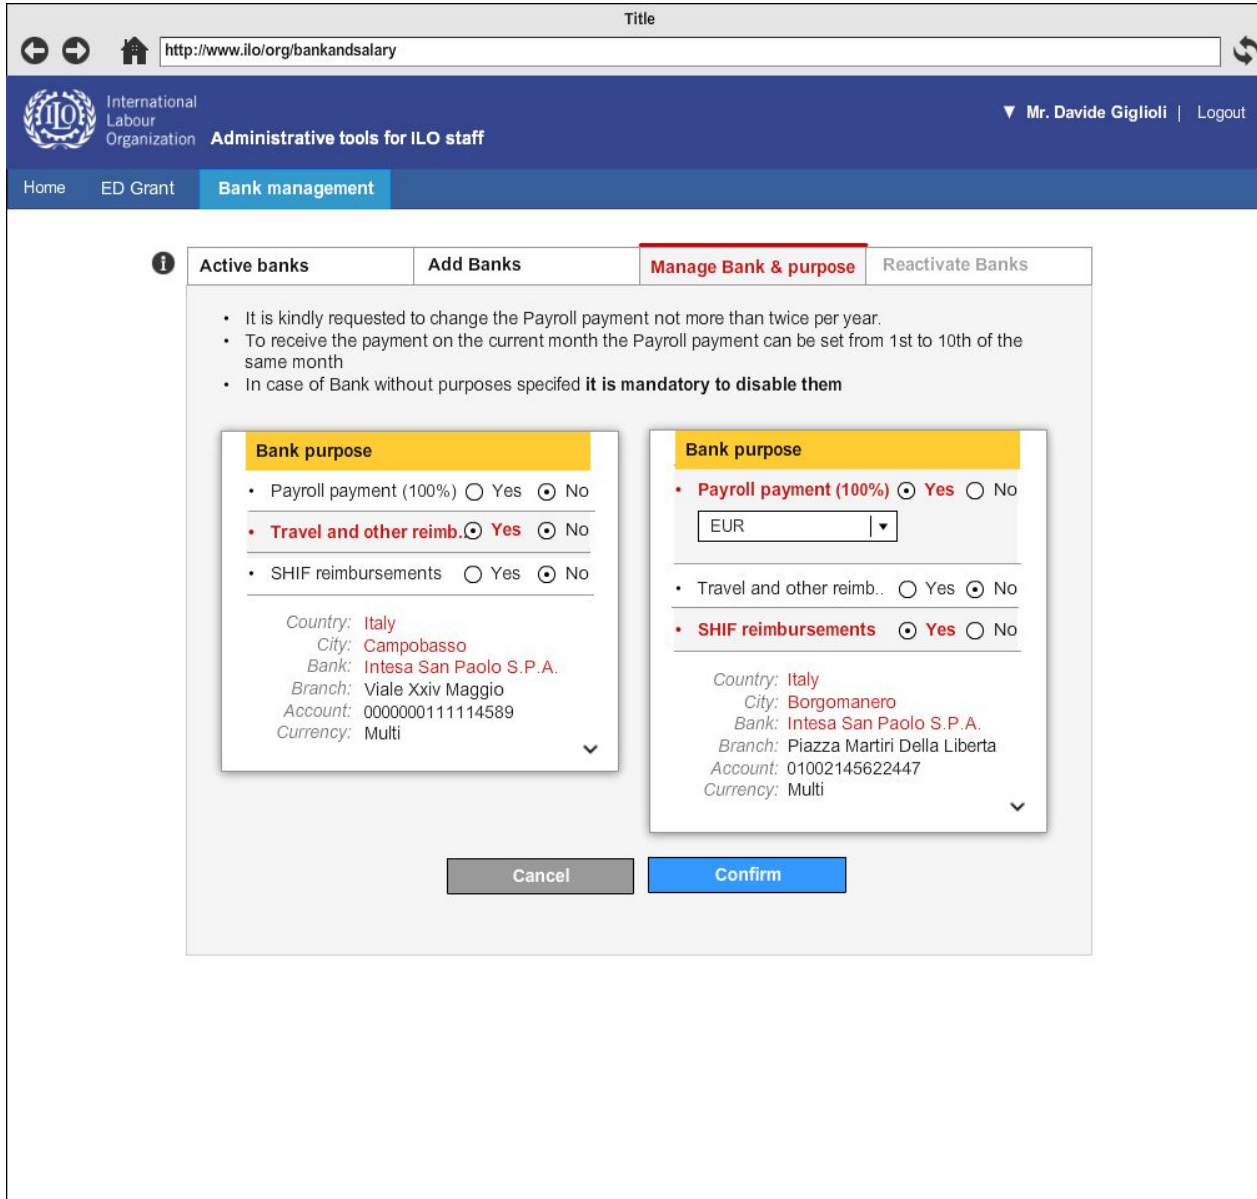

Tasks: Concept > Interaction design > UI design

Deliverables (some):

- Concept for the site
- HTML prototype for front-end (and UX documents)
- HTML prototype of Back-office + Concept
- Modular layout system

Web application to manage bank accounts for payroll payment

3. Manage Bank & purpose

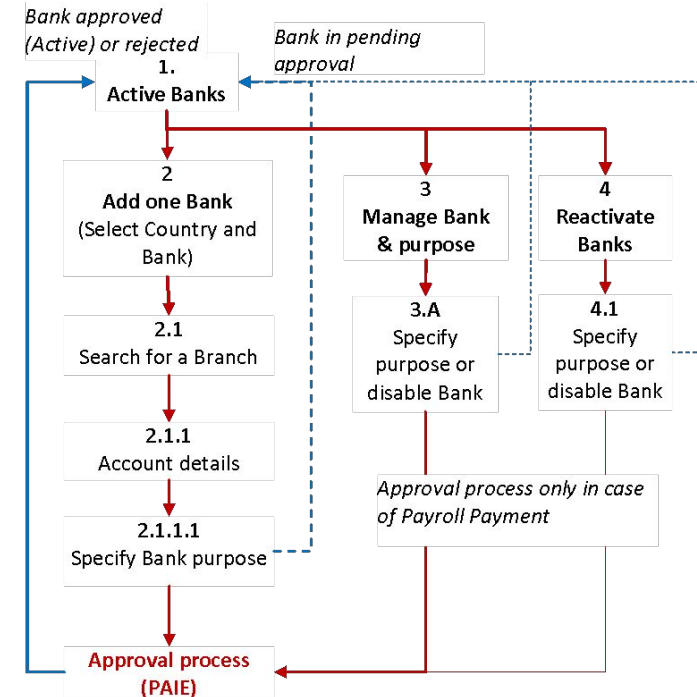

Goal: Design of an administrative web application used by ILO employees to manage bank accounts for payroll payment. The application is connected to the ILO ERP (ORACLE).

Tasks: Interaction design

Deliverables

→ Application workflows and interaction design (wireframe)

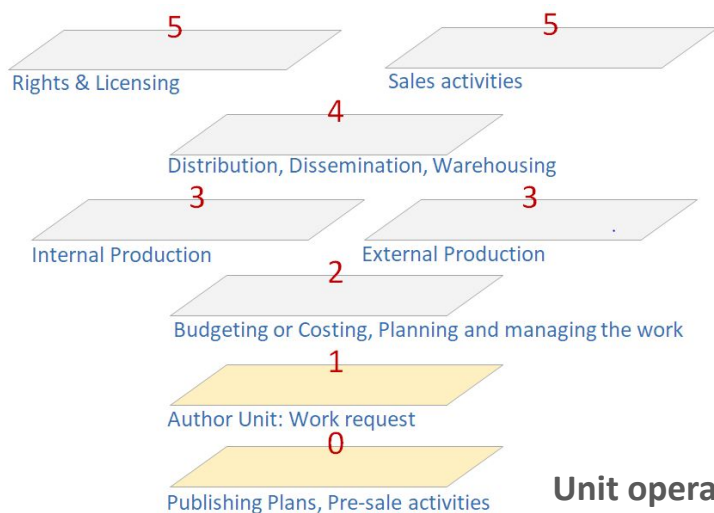

Digital tools for the ILO Publishing processes (UN Agency)

Goal: optimization and standardization of workflows for the ILO Publishing Units. Design of metadata sets for the implementation of digital tools.

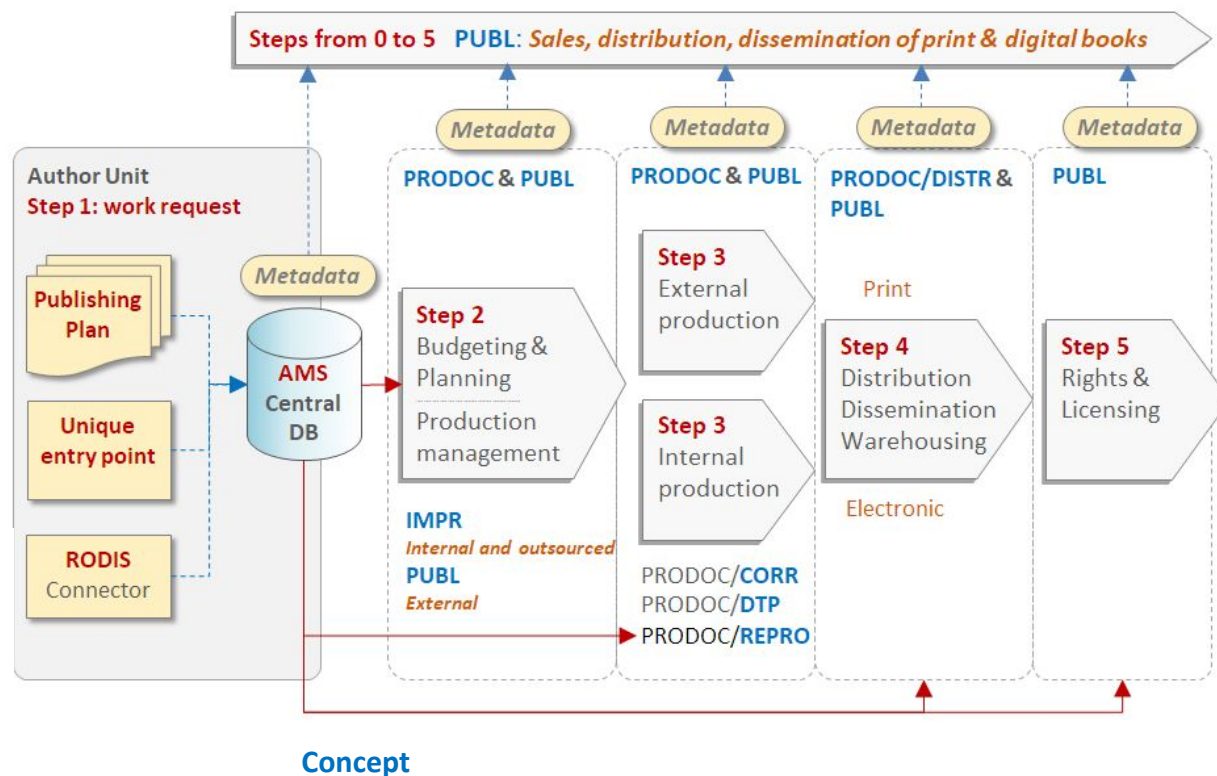

Tasks: Analysis > Concept > Design BP & metadata

Deliverables (some):

- Current workflow
- Analysis of the current processes (an example)
- Concept: architecture of the solution
- Design of new processes (an example)
- Metadata of new processes (an example)

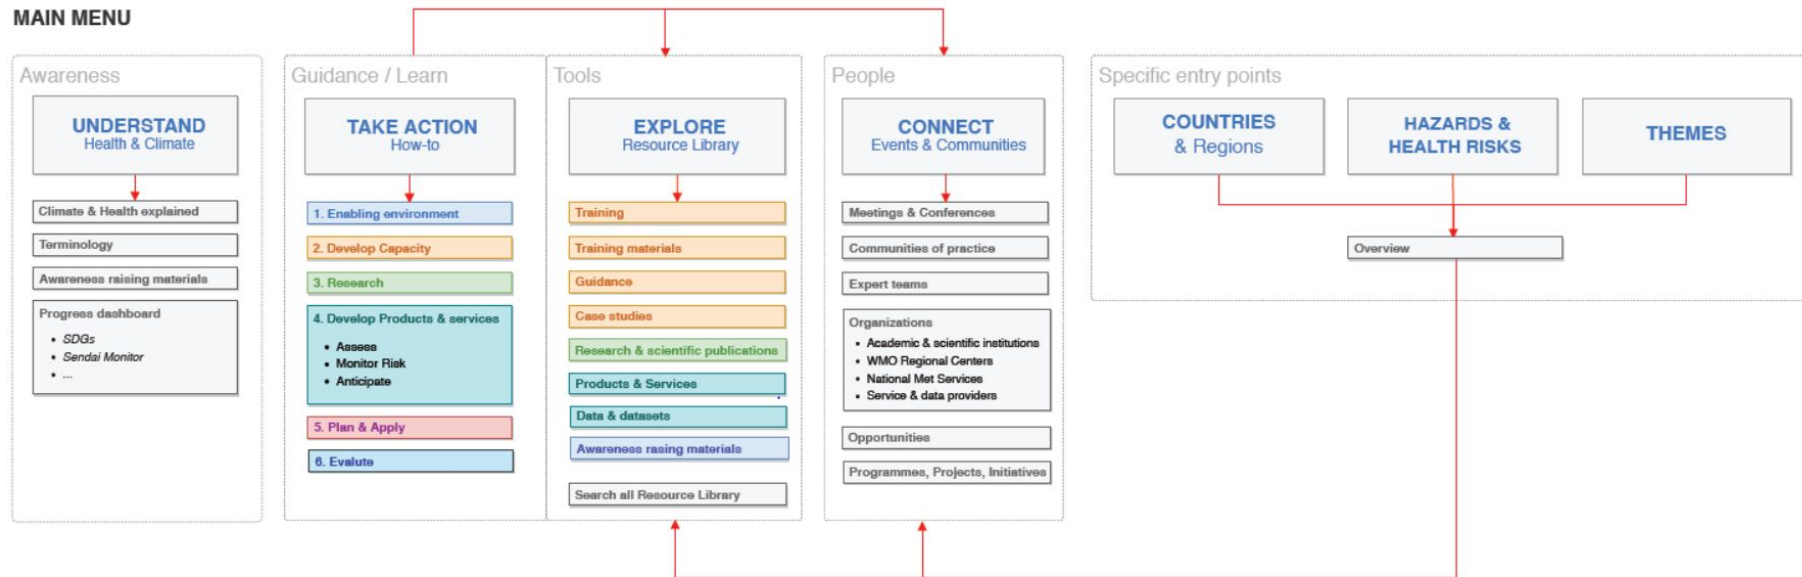

Concept: Architecture of the solution

WHO/WMO: Climate change & Health science portal

MAIN MENU

SECONDARY MENU (HEADER)

Goal: Concept for the creation of a portal on Climate change and health effects

Tasks: Analysis > Concept

Deliveries (some):

- Mental model aligned with contents
- Personas & tasks
- Transition from mental model to the concept
- Content types and contribution methods
- Concept: navigation & key pages
- Workflow

UX & UI Design

User Experience Design

- Information Architecture
- Interaction Design

User Interface Design

Visual Design

Corporate Identity

E-crf, Airon Telematica (Medtronic)

Goal: Re-design of UX and UI
Tasks: Interaction design > UI design

Deliveries:

- ➔ Wireframe for Interaction design
- ➔ HTML prototype for UI

Prevention Web (UN)

The screenshot shows the PreventionWeb website interface. At the top, there is a navigation bar with 'UNISDR' and 'PreventionWeb' on the left, and a grid icon on the right. Below this is a header section with the 'PreventionWeb | 10 years' logo and the tagline 'The knowledge platform for disaster risk reduction - 10th Anniversary'. A search bar is located on the right side of the header. Below the header is a main navigation menu with categories: 'DISASTER RISK', 'SENDAI FRAMEWORK', 'COUNTRIES & REGIONS', 'THEMES', 'HAZARDS', and 'KNOWLEDGE BASE'. The main content area features a large image of a coastal cliffside with the headline 'England: Coastal flood and erosion protection lacking as climate changes'. Below the headline is a sub-headline 'A new report by the Committee on Climate Change warns that coastal communities in England are already under significant and increasingly threatening pressure from flooding and erosion. England must implement a new, long-term approach to coastal management, but current plans, funding, and legislation remain insufficient.' To the right of the main article is a 'Share your content' button. Below the main article are three smaller featured articles: 'Canada: B.C. wildfires could be as deadly as in California within 20 years', 'Climate change, rising sea levels a threat to farmers in Bangladesh', and 'Small Island Developing States'. At the bottom of the page, there are sections for 'Featured collection', 'Blog: DRR Voices', 'DRR Publications', and 'Sendai Framework for Disaster Risk Reduction 2015-2030'.

NEWS E APPROFONDIMENTI

→ RC auto e moto italiane le più care d'Europa

La situazione sul caro-tariffe RC non è migliorata, le assicurazioni italiane restano le più care d'Europa. Il problema principale è il fenomeno delle frodi ai danni delle Compagnie e la dimensione del costo dei sinistri

→ Caro polizza e antitrust

"Fra il 2009 e il 2010 l'assicurazione RC auto è cresciuta del 25%, l'RC moto addirittura del 35%" dichiara Antonio Catricalà

→ Prova il polizzometro

Per sapere quali sono i costi RC Auto e Moto nella tua provincia e quanto puoi risparmiare

DICONO DI NOI

cercassicurazioni.it è il punto di riferimento dei media italiani per l'andamento dei prezzi e i principali trend del mercato assicurativo

ANSA

Il 5,5% dei veicoli circolanti e' a doppia alimentazione, percentuale che sale al 16,2% tra le auto nuove [>>]

CORRIERE E CONSUMI

Sui comparatori il risparmio medio è del 40%, perchè esiste l'assicurazione migliore per ogni profilo [>>]
